

Residents:

This correspondence is to let you know that the non-potable irrigation system was turned on April 19th, 2024. We apologize in the delay of getting this item out (an announcement was posted to the District's website at <https://vemd.specialdistrict.org>), but appreciate your understanding and patience as we continue to coordinate the operations of this system with another manager. General information for the system is as follows:

The Metro District supplies non-potable irrigation water to residents. The non-potable water activation is anticipated in mid-April each season. **Once notified that the system is going on, do not immediately activate your system as the Metro District is still chlorinating the lines and pressurizing the system. Please ensure that your valves are closed and the shut off valve in the meter pit is in the off position. Landscaping damage caused as a result of premature watering or open valves is not the responsibility of the Metro District.**

When the irrigation water has been activated and is available for residential use, owners will be notified via email. Please ensure that we have the best contact information on file in our system. Email contact@frommco.us to update contact information.

The District provides the main water distribution. Owners are responsible for turning on/off the water and responsible for maintaining any irrigation-related issues on your property. If there is a concern about the curb stop or the meter, please notify the District. Otherwise, please contact an irrigation professional to address matters pertaining to low pressure, clogged heads, clogged filters, sprinkler leaks, valve leaks etc.

WATER USE AND APPROVED WATERING DAYS

Healthy lawns in Colorado require approximately 1,000 gallons of water per 1,000 sq. ft. of turf per week, which equals approximately 21,000 gallons of water per 1,000 sq. ft. of turf per irrigation season. **Avoid over irrigating.** Irrigation is permitted between 6am and 10am **ONLY** on the below days:

Even numbered Addresses: Monday, Wednesday, Friday
Odd numbered Addresses: Tuesday, Thursday, Saturday
Watering is NOT permitted on Sunday.

Water Restrictions:

To avoid evaporation losses from hot and windy weather conditions, **watering is not permitted between 10:00 am – 6:00 pm.** Please adjust your irrigation clocks accordingly.

FINES WILL BE ASSESSED IF YOU DO NOT FOLLOW THE 2024 WATERING GUIDE.

If you have any further questions or concerns, please contact Fromm & Company at contact@frommco.us.

Thank you!
